NEW SMALLER SIZE MANHOLES

We have in our Denver stock Royer's new small diameter monitoring manholes. These 4" and 6" aluminum manholes are ideal for your smaller monitoring wells and piezometer installations. Both are all aluminum construction with 6" aluminum skirts. A watertight compression seal is provided by Buna-N-Nitril O-rings. The lids are secured with two stainless steel socket head cap screws (with a hex key Allen wrench supplied with each manhole). The lids are clearly marked with "Monitoring Well" designation and "Do Not Fill" warning. There is also a well log pad provided for well numbering.

4" & 6" MONITORING MANHOLES

- \$ 45.50 4" x 6" Royer's Aluminum Watertight Manholes w/ 4" opening and 6" skirt (5-3/4" outside edge x 4" opening x 2-7/8" unobstructed throat opening x 7" deep x 2 lbs) 46MAN
- \$ 60.50 6" x 6" Royer's Aluminum Watertight Manholes w/ 6" opening and 6" skirt (7-1/2" outside edge x 6" opening x 3-7/8" unobstructed throat opening x 7" deep x 4 lbs) 66MAN

STANDARD MONITORING MANHOLES NOT WATERTIGHT / NOT LIMITED ACCESS

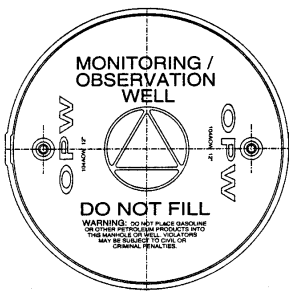

Universal Valve's 60MW series standard monitoring well manholes are recommended for applications where limited access is not required. These manholes feature a clearly marked cast-in "Monitoring Well" designation on the cast iron cover, in accordance with API RP 1615. Screwdriver slots in the cast iron ring make for easy removal of the lid. Heavy galvanized steel skirts are standard. These manholes are H-20 load rated.

- \$ 33.00 60MW-8075 8" x 7" Manhole (9-1/4" outside edge x 8" opening x 7-1/4" deep x 11 lbs). 60MW8075
- \$ 45.00 60MW-1280 12" x 8" Manhole (13-7/8" outside edge x 12" opening x 7-1/2" deep x 25 lbs). 60MW1280

MANHOLE REPLACEMENT PARTS

Since we stock and sell both Universal Valve and OPW/Dover manholes, you must know the brand and size of your manhole before ordering repairs.
