S10AE10T STAR ELIMINATR II FULL SPECTRUM AUTOMATIC WATER TREATMENT & FILTRATION SYSTEM \$ 1479.00 + \$ 85.00 S&H

The Elimintr II Filtration System solves multiple water problems with one unit. It removes iron taste in water. Removes rotten egg smell caused by sulfur. It eliminates rust stains on laundry, tubs, and sinks. Improves the taste of water and beverages. It prevents corrosion on pipes and fixtures due to acidity in your water. This full spectrum filter is less costly than a multiple filter installation. No chemicals are required to regenerate the system and there are no pre-treatment chemicals needed. It requires only a periodic backwash to keep the system in top condition. The system is controlled by a fully automatic, motor operated, brass control valve with a 12 day timer. The modular valve and timer design features air draw shut-off during the regeneration cycle.

Maximum concentration limits for water problem treatment:

Ferrous Iron	Max 20 ppm	Sulfur	Max 5 ppm
Acidity Range	6.0 to 8.0 pH	Turbidity	Max 125 ftu
Taste, Odor, or Color		Suitable for a wide range of applications	
Average System Capacity Flow Rate 5 gpm			

S07UF1016BW Bottled Water Factory for City Water – Whole House Automatic Taste & Odor Filter \$ 705.00 + \$ 70.00 S&H

Filter effectively reduces over 100 EPA priority water contaminants. Also reduces chemicals, pesticides and herbicides throughout your whole house water supply. This filter is ideal for reducing chlorine taste and other municipal water treatment chemicals throughout your entire house. It is simple to install and plumbs directly into a 3/4" line before your water heater. This filter wastes no water, uses no electricity, is chemical free and retains the vitamins and minerals essential to your good health. The mineral bed needs replaced approximately every three years, which makes this filter economical to operate. Now it is easy to have bottled water quality from every tap in your house. This filter has a maximum service flow rate of 5 gpm.

S07AF1016 Bottled Water Factory for Rural Well Water – Whole House Automatic Taste & Odor Filter \$ 845.00 + \$ 70.00 S&H

Same whole house improvement to your water supply if using rural well water. Unit comes with by-pass valve and #5600 control valve assembly to make your taste and odor treatment of well water fully automatic. Both the service flow rate and backwash rate are a maximum of 5 gpm.

S07UF06C Deluxe Undercounter Activated Carbon Taste & Odor Filter \$ 209.00 + \$ 20.00 S&H

Simple to install and easily replaces small standard cartridge type filters. Mineral is easily replaceable approximately every three years. Compact in size (7" wide x 20" high) so it will fit under most kitchen sinks. Service flow rate is 3 gpm. Like having bottled water from your kitchen tap.

DWS2MKIT 2-Stage Taste / Odor / Chemical / Heavy Metals / & Giardia Removal System w/ Auto Shut-off Valve \$ 129.00 + \$ 10.00 S&H

Shipped to you pre-assembled and ready for easy installation. Comes complete with both filter cartridges. Stage #1 has a PFC1 dual purpose carbon impregnated cellulose cartridge polishing your water and trapping sediment down to 5 micron. Stage #2 has a PFCBR210 carbon block multimedia cartridge that greatly reduces the amounts of heavy metals and VOCs in your water. The cartridge will remove up to 96% of lead and upto 98% of mercury. In addition this cartridge will remove up to 99% of giardia and cryptosporidium cysts as well as sediment particles down to 1/2 micron in size. To insure that your water is always being filtered this unit comes with a WQA validated, 1800 gallon, patented automatic shut-off valve made from NSF listed materials. Filter has a lead free, long reach chrome faucet that meets State of California requirements. Unit has a white aluminum mounting bracket with stainless steel screws. A saddle valve for tapping into your water service line is also included.
